SUMMARY

SQL Developer with 2.9+ years designing and maintaining T-SQL and PL/pgSQL stored procedures, functions, and ETL pipelines across SQL Server and PostgreSQL. Experienced building staging/dimensional schemas, automating data workflows via SQL Server Agent Jobs, and implementing data quality and auditing checks for MIS/ERP reporting. Strong hands-on background in production troubleshooting, query optimization, and cross-functional collaboration with analysts and business teams.

TECHNICAL SKILLS

Databases: SQL Server (T-SQL), PostgreSQL (PL/pgSQL), MySQL
SQL Development: Stored Procedures, Functions, Triggers, Views, CTEs, Window Functions, Query Optimization, Indexing, Execution Plan Analysis, Data Modeling
ETL & Automation: ETL Pipelines, Staging/Dimensional Schemas, Data Quality & Auditing, SQL Server Agent Jobs, pg_cron
Programming: Python, JavaScript
Tools & Platforms: SSMS, DBeaver, Supabase, GitHub, Jenkins, Tableau, Excel

EXPERIENCE

SQL Developer **Jul 2026 – Present**
Goa Electronics Limited (GEL), Goa — GEL/EDT Government e-Services Platform

- Write, debug, and maintain PL/pgSQL stored procedures and functions supporting application-processing workflows, RTS (Right to Service) appeal management, and MIS reporting on a government e-services platform.
- Develop refcursor-based search/reporting functions with multi-table joins, computed delay/turnaround metrics, and multivalue parameter filtering.
- Implement working-days and pendency-period calculations against a business calendar to track SLA compliance, and reconcile application data across source and reporting tables.

SQL Developer **Jun 2024 – Jul 2026**
Mograsys Technologies Ltd., Margao — mograERP

- Worked with analysts, developers, and business teams to turn data requirements into scalable SQL data models and pipelines.
- Designed and maintained data schemas, staging tables, and dimensional-style models supporting analytics, reporting, and downstream consumption.
- Built and optimized ETL pipelines in SQL, loading and transforming data from OLTP and intermediary systems while maintaining accuracy and consistency.
- Implemented data quality checks, auditing, and error-logging using SQL logic and control tables; automated recurring workflows via SQL Server Agent Jobs to reduce manual processing.
- Prepared analytics-ready datasets enabling dashboards and self-serve reporting; independently troubleshot production data issues to maintain data availability and quality.

Intern Software Developer **Dec 2023 – Jun 2024**
Mograsys Technologies Ltd., Margao

- Contributed to backend (SQL) and frontend tasks; gained exposure to CI tooling (Jenkins).

PROJECTS

Retail Sales & Customer Analytics (Olist E-Commerce, SQL Server) **Personal Project | GitHub**

- Built a SQL Server database (9 tables, ~1.5M rows) with primary keys, 6 foreign keys and a 14-entry data-quality log; fixed a silent column misalignment in a BULK INSERT load using a staging-table pattern.
- Created 6 views and 1 stored procedure for RFM segmentation (94,398 customers), retention, delivery SLA, seller ranking and revenue growth using CTEs and window functions (LAG, ROW_NUMBER, DENSE_RANK, NTILE).
- Tuned the RFM query with execution plans and STATISTICS IO/TIME, cutting logical reads from ~406K to ~11K; kept only indexes that gave a measurable gain.
- Insights: 97% of customers buy only once; 8.11% of orders arrive late, worst in Alagoas (23.93%).

Tech Stack: SQL Server 2025, T-SQL, SSMS, Window Functions, CTEs, Indexing, GitHub

Automated Daily Work Report System **Personal Project**

- Built an automated reporting pipeline using PostgreSQL and Supabase, with PostgreSQL functions/tables driving daily task management and Supabase Edge Functions handling backend automation.
- Integrated Gmail SMTP for automated report delivery and configured pg_cron jobs for scheduled, unattended execution; version-controlled with GitHub.

Tech Stack: PostgreSQL, Supabase, TypeScript, pg_cron, Gmail SMTP, GitHub

EDUCATION

Bachelor of Engineering, Computer Engineering — 8.21 CGPA **2019 – 2023**
Shree Rayeshwar Institute of Engineering and Information Technology

CERTIFICATIONS

- Python101 for Data Science — IBM (2022) | The Business Intelligence Analyst — Udemy (Ongoing) | Learn Python Programming Masterclass — Udemy (Ongoing)
