Experience

Mograsys Technologies Ltd. Margao
Software Engineer -SQL June 2024 – Present
mograERP

- Collaborated with analysts, developers, and business teams to **understand data requirements** and translate them into scalable **SQL-based data models and pipelines**.
- Designed and maintained **data schemas, staging tables, and dimensional-style models** to support analytics, reporting, and downstream data consumption.
- Built and optimized **ETL pipelines using SQL**, loading and transforming data from OLTP and intermediary systems while ensuring **data accuracy and consistency**.
- Implemented **data quality checks, auditing, and error-logging mechanisms** using SQL logic and control tables.
- Automated data workflows using **SQL Server Jobs**, improving reliability and reducing manual processing.
- Prepared **analytics-ready datasets** to enable dashboards and self-serve reporting.
- Troubleshot production data issues independently and in collaboration with cross-functional teams, maintaining **high data availability and quality**.

Mograsys Technologies Ltd. Margao
Intern Software Developer December 2023 - June 2024

- Worked with **SQL, Angular, and Jenkins**, contributing to both backend and frontend tasks.
- Focused on **frontend development using CSS**, ensuring responsive and user-friendly UI designs.
- Gained hands-on exposure to **continuous integration tools** and collaborative development practices.

Onstro Verna Goa
Intern Frontend Developer August 2022 – October 2022
FOODWISE

- Developed a recipe-finding application enabling users to select food items and discover recipes.
- Designed wireframes and user interface as **Frontend Developer & UI/UX Designer-** , ensuring functionality and visual appeal for an optimal user experience.

HUBSTAFF

- Built a time-tracking system to record employee check-in/check-out times and generate salary slips based on work hours.
- Designed responsive UI with cross-device compatibility and created wireframes to streamline user flow for both employees and HR.

Education

SHREE RAYESHWAR INSTITUTE OF ENGINEERING AND INFORMATION TECHNOLOGY
Bachelor Of Engineering Computer • 8.21 CGPA
2019-2023

Projects

Automated Daily Work Report System | Personal Project

- Developed an automated reporting system using Supabase and PostgreSQL.
- Created PostgreSQL functions and database tables for daily task management.
- Implemented Supabase Edge Functions for backend automation workflows.
- Integrated Gmail SMTP for automated email delivery of daily work reports.
- Configured pg_cron jobs for scheduled report execution.
- Used GitHub for version control and project management.

Tech Stack: PostgreSQL, Supabase, TypeScript, Gmail SMTP, pg_cron, GitHub
